

## A MESSAGE FROM THE SUPERINTENDENT

As partners in education we realize that the education of our child(ren) is the joint responsibility of the schools, the home, and the student.

Each curriculum brochure has been written to give you, the parent, a broad overview of the skills your child is expected to learn at specific subject and grade levels. This pamphlet does not contain all the skills your child will learn. Rather, it is an outline for you. We hope that you use this guide to help your child at home. Together, we believe much can be accomplished.

## THE PHYSICAL SETTING Earth Science Content

Kindergarten students will:

### OBSERVE THE WEATHER

They will:

- explore different kinds of weather – sunny, rainy, cloudy, windy, snowy, hot, cold
- chart weather through daily observation
- explore seasonal weather changes – spring, summer, fall, winter
- recognize seasonal changes throughout the year.

## THE PHYSICAL SETTING Physical Science Content

Kindergarten students will learn that:

### OBJECTS AND EVENTS HAVE DISTINCTIVE PROPERTIES

They will:

- describe, compare, and sort objects by color, shape, size and weight, be able to describe properties of objects based on their surroundings, explore the motion of objects
- investigate the composition of materials
